

PROFESSIONAL SUMMARY

AI Engineer with 4+ years of production experience building generative AI systems and LLM-powered applications for enterprise and healthcare environments. Specializes in RAG architectures, multi-agent pipelines, and scalable inference using LangChain, LangGraph, and foundation models. M.S. Computer Science, University of Illinois Springfield (May 2026).

TECHNICAL SKILLS

- Generative AI & Foundation Models:** AutoGen, LangChain, RAG, Prompt Engineering, OpenAI, Vector Databases, LLMs, NLP
- ML & Deep Learning:** TensorFlow, Keras, scikit-learn, SpaCy, NLTK, Transformers, BERT, Custom NER
- MLOps:** Docker, AWS (ECS, EKS, Lambda, Bedrock, SageMaker), Apache Airflow, PySpark, CI/CD (Jenkins, GitHub Actions)
- Backend:** Python, Java, React.js, Next.js, SQL, FastAPI, gRPC, PostgreSQL, Redis, Microservices Architecture, Distributed Systems
- Responsible AI:** Model Evaluation (relevance, bias, hallucination detection), Fairness Assessment

EXPERIENCE

MedLaunch Concepts

AI Engineer

- Designing and deploying LLM-powered clinical decision support features using **LangChain**, **LangGraph**, **Claude-SDK** and **FastAPI**; implementing responsible AI guardrails for clinical accuracy and hallucination mitigation in healthcare workflows
- Building **RAG pipelines** over proprietary medical knowledge bases using **FAISS** and **OpenAI API** to surface evidence-based answers for healthcare device commercialization workflows

June 2026 - Present

Remote (Denver, CO)

Product Dossier Solutions Pvt Ltd (Kytes)

Software Engineer, AI-ML & Product Development

- Architected and deployed a production **Retrieval-Augmented Generation (RAG)** system leveraging **LangChain**, **Mistral-7B foundation model**, and **FAISS** vector database, implementing **prompt engineering** techniques including few-shot prompting and **context window** optimization to serve **10,000+ users**
- Engineered **MLOps** data processing infrastructure by migrating legacy **Airflow** workflows to a distributed **PySpark architecture (Databricks)** with parallel execution patterns, reducing model training data pipeline latency by 65%
- Implemented production safety **guardrails** using **LangChain's** moderation chains and custom validation logic to enforce **responsible AI** controls on **RAG system** outputs

June 2023 - July 2024

Pune, MH, IN

Dasha Krit Technology Pvt Ltd

Software Engineer

- Architected a **multi-tenant** SaaS POSH compliance app using **Django** and **PostgreSQL** by designing custom authentication, 10+ relational models, FSM (transitions), RESTful APIs and deployed it on **GCP** to 10+ clients.
- Streamlined real-time **WebSocket** data pipeline with **SQLAlchemy** processing 1000+ updates/minute, enabling 100+ traders to make data-driven decisions.

April 2021 - April 2023

Pune, MH, IN

PROJECTS

- Multi-Agent Research Assistant System:** Engineered a Microsoft AutoGen multi-agent system (Research, Analysis, Writing) that processes 10+ query types in <5s; integrated Tavily Search with robust error handling to synthesize 8+ sources per request
- Neurofinity |** | Fine-tuned **Flan-T5 (LoRA/PEFT)** on meeting transcripts to auto-generate hierarchical **mind maps**, deploying a **FastAPI + Streamlit** application with **neurodivergent accessibility** controls (contrast, spacing, themes) and a custom structural evaluation framework measuring tree edit similarity and hierarchical depth
- ASL-to-Text:** Engineered an **ASL-to-text platform** by fine-tuning a **VideoMAE Transformer** on a **239-class dataset**, boosting accuracy from **62% to 82% (+32%)**, implemented **Universal Temporal Sub-sampling** for GPU-constrained training and applied **Responsible AI** principles to reduce recognition variance by **18%** across diverse signing styles
- Invoice IQ |** Built an end-to-end invoice extraction pipeline using custom **SpaCy transformer NER model**, achieving **95% F1-score**, extracting 8 entity types from 200+ invoices and deployed as **Flask API** with GPU-accelerated **Tesseract OCR**

EDUCATION

University of Illinois Springfield

Master of Science, Computer Science

August 2024 - May 2026

Springfield, IL

Pune University

Bachelor of Engineering, Computer Engineering

August 2016 - May 2021

Pune, MH, IN

CERTIFICATE

- AWS Machine Learning Essentials (Nov 2025) | AWS Essentials (Jun 2024)
